## NYA Times-Contrarian

MY LETTER TO YOU

NY2-14-22

### **Folks, Clearing up some things:**

The letter that prompted me to act on SPOTIFY was written by 270 hundred *medical professionals*, not doctors. I erroneously said they were doctors after having read disinformation on the internet. About a third of them were doctors. But many of the rest were nurses and hospital assistants. I respect and honor all those people and the work they continue do as I write this.

I read their whole letter. I still support all of them. My mistake was calling them all doctors. I read and usually believe the Guardian and Guardian made a rare mistake:

*The Guardian: "Menace to public health: 270 doctors criticize Spotify over Joe Rogan's podcast" and Rolling Stone: "A Menace to Public Health: Doctors Demand Spotify Puts an End to Covid Lies on Joe Rogan Experience."*

So I was misinformed too! Glad it wasn't a life and death decision for me.

I still stand behind the medical professionals and others who signed that great letter. I stand with them, at their side.

Also fyi - To clarify more bad misinformation online that is used to make points against me in some of the letters included here:

The publishing share Hipgnosis has in my copyrights is in the Hipgnosis Songs Fund that is publicly traded on the London Stock Exchange.

The Blackstone investment went into a separate Hipgnosis Private Fund and none of that money was used for the Hipgnosis Songs Fund. Pfizer has not invested in Hipgnosis but a past Pfizer CEO is a senior adviser for Blackstone, see link below.
